To Whom It May Concern:

Redline Design Group performed outstanding service and delivery to Fluor's Power Group in Charlotte. Redline's up-fit effort for Fluor required working under tight deadlines, third party contractors, real estate construction managers, and a directed engineering group.

We were very pleased with our design and all the recommendations made by Redline. Support was provided every step of the way to help guide us through the complicated rehabilitation code that applied to our up-fit. We had the opportunity to meet with many employees and were always impressed with performance, knowledge, and attitude.

Fluor will continue our relationship with Redline and are pleased to recommend their services.
